

ABOUT US

Located in the city of Ranong, on Thailand's coast of the Andaman Sea and near the Myanmar borders, we are based on one of the most "strategic" spots for diving in the South-East Asia. With the two super-famous diving destinations of Thailand, the Surin and the Similan Islands, near by and with the rarely visited and still widely virgin Mergui Archipelago of Burma (Myanmar) right next door, we are here to offer you without a doubt some of the best diving in the world.

Parks, with many spectacular waterfalls, all of which is near by.

AIDC head manager is Preben from Denmark. With more than 2000 logged dives in Thailand and Burma alone, his passion for diving never ceased growing. His knowledge of the local marine environment is excellent and he is personally the boat supervisor and a guide on most trips, always filming your underwater adventures with us.

With a high level of professionalism, we have a strict philosophy of putting safety above all else. But we are not a big impersonal factory-like dive center with "mass produced trips". Every single trip for us is special and we pay personal attention to every detail. Travelling and diving with our staff you will find yourself in a very friendly atmosphere and among people who absolutely love diving. We are passionate about what we do and we do our best to make each trip as exciting as possible and always an unrepeatable experience!
